TERRAIN

Avoid the problem?
Avoid slopes >30°.
Avoid hazardous aspects.
Know the elevation
of the problem.

Accept the problem?
Adopt safe travel techniques.
Choose low consequence terrain.
How far from help are we if we
do have a problem?

PEOPLE

Equipment – do we all have transceiver, shovel, probe?

Training – does everyone know how to use it?

Are we a team or a group?
Choose terrain appropriate for
the weakest member.
Is the team experienced enough
for the terrain and conditions?

SNOW

Have we seen any warning signs?

Recent avalanches.
New snow.
Recent wind loading.
Shooting cracks.
Whumping sounds.
Rapid change in temperature.
